

CLIPSAL HOMESAFE™
Security Video Phone

See who's there... day or night.

The HomeSafe Security Video Phone lets you answer the door from the kitchen, the family room, in fact anywhere at all in the home!

This advanced security device consists of a Camera with microphone, which is installed outside the home's front entrance, and the Video Phone located inside, which displays clear, high resolution images. The Camera features infra-red illumination, enabling you to clearly see visitors even in the middle of the night.

The ability to see and talk to visitors before the front door is opened ensures safety and peace of mind for every member of the family.

Remote Door Key

For added convenience, the Security Video Phone unit can be used to open the door to visitors if connected to an electronic door lock.

Plus, a Convenient Indoor Intercom

As a bonus feature, if more than one Video Phone is connected to the camera, it is possible to use the phones as a handy intercom between rooms.

Optional Door Chime

If you are in a large home, it may pay to connect an optional Expansion Door Chime to the Video Phone. This will enable the door bell to sound at both the Video Phone and the Door Chime.

Clipsal HomeSafe - The Complete Home Security System

The Security Video Phone is just part of the Clipsal HomeSafe Range, which offers a complete range of security products for your home or business. For a brochure on the Clipsal HomeSafe Range, please call your Clipsal State Office.
